

ATTENTION NORTHERN BORDER PIPELINE CUSTOMERS

REMINDER - Disaster Recovery Testing - Additional Firewall Requirements

TransCanada will begin Disaster Recovery testing across our multiple transportation system applications, to ensure its preparedness in the event an actual disaster should occur. As part of this exercise, TransCanada is asking that all customers and EDI providers ensure that they have our disaster recovery (DR) servers whitelisted and accessible to their internal systems.

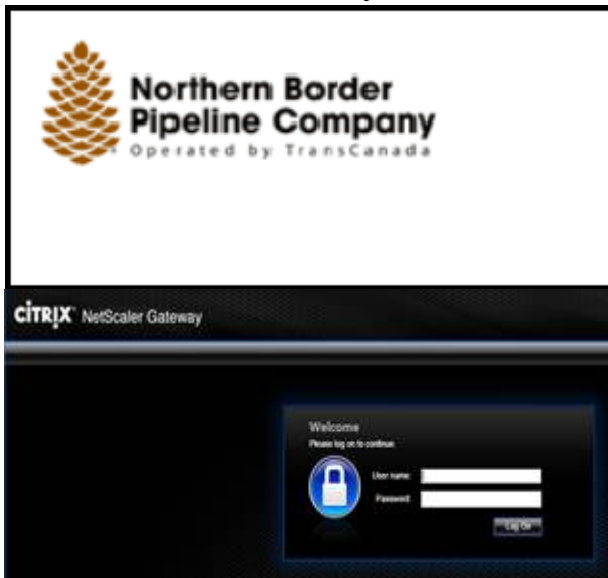

TransCanada will execute their Disaster Recovery Testing exercise for the Northern Border application on September 11, 2018. To ensure no loss of access to our system, we are providing our customer/clients the test DR URLs for verification that connectivity with Northern Border will not be lost during the test period.

If you have not tested your connectivity, please click on the following URLs to ensure connectivity is working correctly.

Successful Connectivity Results:

NOTE: Please enter your log on information and you should receive the following result:

TransCanada's DR Application Portal for Northern Border

For technical assistance, please contact the Service Desk at x2111 (888-546-3484).

There are no resources currently available for this user.

This will result in a successful connectivity test. If your connectivity fails, please reach out to your IT Support and have them contact your Scheduling Representative.

If you have any questions about this notice or require additional information, please call the scheduling hotline at 888-750-6275 or send an email to WesternPipeScheduling@transcanada.com.
