Daily Message:

Northern Border High Inventory OFO Watch (Posted 06/18/2020)

Details:

Northern Border High Inventory OFO Watch (Posted 06/18/2020)

Effective immediately, Northern Border Pipeline is issuing an OFO Watch. Northern Border is concerned about the operational integrity of its system as a result of high line pressure.

The OFO watch is in effect through gas day 06/24/2020, in order to allow for the Northern Border pipeline system to maintain its operational integrity. Northern Border has limited flexibility to manage imbalances and strongly encourages all shippers manage their system requirements to ensure the matching of receipts and deliveries daily.

Absent voluntary imbalance management by shippers to ensure daily balancing, Northern Border may be required to take further action, including the immediate issuance of an imbalance Operational Flow Order. If further action is required, it may be necessary for that action to become effective immediately, with no additional prior notice available.

This posting will be updated as more information becomes available.

Please contact your Northern Border Nominations Representative with any questions regarding nominations or scheduling at (888) 750-6275.

Please contact System Operations with any questions regarding operations or facilities.
